FOR IMMEDIATE RELEASE

Louis Electric Amplifiers Announces Limited Edition Cobra KT-66/183 Amp

The "legendary tone" brand's customizable, 100% hand-built, Dumble inspired head with a limited 25-count run.

Bergenfield, N.J. / July 30, 2024: LOUIS ELECTRIC AMPLIFIERS has announced the brand's first limited edition run with the Cobra KT-66/183 head amplifier. The Cobra KT-66/183 base model sports a hand-selected, durable, and sleek brown Tolex cover with black and white accents designed to add a classic touch to any gear collection. Enjoy countless combinations of tone to discover your personal sound with the KT-66/183's 10-position custom feedback control rotary knobs.

The Cobra KT-66/183 is limited to 25 custom-made-to-order requests due to its unique components: 4 select KT-66 output tubes. Experience the same power as Louis Electric's new [Cobra 6L6/183 amplifier](#), but with an incomparably rounder and thicker tone that users and listeners will love.

Musician Jorma Kaukonen coined the phrase "Louis Electric Rules for Real Life" in 2014, which remains standard a decade later with the creation of the Cobra KT-66/183. Designed with user experience and tone at the forefront, the KT-66/183 packs rich sound with robust bass into a portable package. Sizing up at less than 2 feet long and 1 foot tall/wide, the KT-66/183 is suitable for on the road, at the gig, and plug-and-play jam sessions right at home.

Louis Electric Cobra KT-66/183 Dumble inspired head amplifier base model.
